

Welcome! This is the first edition of Newsletter series of the AI4DI project! In this Newsletter we will present you with our project's progress and event highlights. The AI4DI Newsletter will be published until the end of the project. Through our project's website, Twitter account, and this Newsletter, we will keep you informed about project's progress.

Events

AI4DI Vision Meeting and AI4DI Symposium 2020 (AI4DIS 2020)

January 22nd – 24th 2020, Bologna, Italy

AI4DI Consortium members and guests met in Bologna for a three-day event of project's Vision Meeting and the AI4DI Symposium.

The 22nd of January was dedicated to project's internal meetings, addressing the developments in the Supply Chains and Work Package 2 'System Level Design for Industrial AI Solutions'.

The second day of the gathering was dedicated for a large-scale AI4DI Symposium, titled **AI for Digitising Industry Symposium – Exploring the Future (AI4DIS 2020)**. Over 100 attendees gathered together: researchers, scientists, system developers, manufacturers, practitioners, and standardization experts shared a joint interest in the research and developments of AI, embedded systems, communication, and IIoT technologies for the digital transformation of industry.

Smart City Mindtrek 2020

January 28th – 30th 2020. Tampere, Finland

AI4DI project was presented during the Smart City MINDTREK 2020 by partner Vaisto Solutions, with a presentation titled 'Evolution of Autonomous Technologies for Industrial Environments'. This presentation covered some really interesting topics such as the reinforcement learning workflow for work cycle automation explained in high level or main stream automation control methods compared with bias to machine learning evolution: deterministic, supervised deep learning and main topic reinforcement learning.
